

HisabDo — Test Execution Report

Capstone Project | Track: Software Quality Assurance | Day 8–9

Tester: Mohamed Hany — Junior Software Tester (ISTQB CTFL v4)

Test Period: August 8–9, 2026

1. Scope

This report documents the actual execution status recorded in the HisabDo QA Excel test document for the Day 8–9 Capstone Project.

Testing covers the Website (HisabDo public website, hisabdo.app) and the Mobile Application (HisabDo Android application, com.usman.hisabdo).

The results are based directly on the execution values recorded in the Excel test cases.

2. Execution Summary

Metric	Count
Total Test Cases in Excel	62
Website Test Cases	22
Mobile Test Cases	40
Total Executed	36
Passed	35
Failed	1
Not Executed	26
Blocked	0
Confirmed Bugs	1

Overall Result: 35 test cases passed, 1 test case failed, and 26 test cases remain Not Executed. The execution status is based on the actual Status column in the submitted Excel document.

3. Website Test Execution

A total of 22 website test cases are documented in the Excel file.

Result	Count
PASS	21
FAIL	1
Not Executed	0
Total	22

Executed areas include Homepage, About App, FAQ, Contact, Founder Page, footer/social links, navigation, Blog, cross-browser rendering, responsive behavior, basic performance, SEO/meta information, and internal links.

4. Website Defect — BUG_001

Field	Details
Bug ID	BUG_001
Title	No web-based contact form on the Contact page — only a mailto link
Module	Website - Contact
Environment	Live site — hisabdo.app/contact.html
Severity	Low
Priority	Low
Status	Open

Steps to Reproduce:

1. Navigate to the HisabDo Contact page. 2. Look for a fillable contact form containing fields such as name, email, and message. 3. Review the available contact options.

Expected Result: A working on-page contact form should be available for visitors who do not have a configured email client on their current device.

Actual Result: No web-based HTML contact form is available; the page relies on mailto links for contacting the team.

Related Test Case: TC_W11 — Verify the Contact page provides an actual web-based contact form. Result: FAIL - BUG_001.

5. Mobile Application — Execution Status

A total of 40 mobile test cases are documented.

Result	Count
PASS	14
FAIL	0
Not Executed	26
Total	40

The 14 executed mobile cases cover onboarding, customer creation and validation, customer editing/deletion/search, no-result search handling, transaction recording, balance calculation, invalid transaction amount validation, expense/payment amount handling, large transaction amounts, and transaction notes.

All 14 executed mobile test cases are recorded as Pass in the Excel document.

TC_M15–TC_M40 (26 test cases) are currently marked Not Executed and should only be marked Pass/Fail after actual execution.

6. Testing Techniques Applied

Functional Testing; UI Testing; Usability Testing; Compatibility Testing; Performance Testing; Security Testing; Positive Testing; Negative Testing; Boundary Testing; Validation Testing; Regression Testing.

7. Files in This Package

HisabDo_QA_Test_Plan_Day8_Day9_Final.md — QA Test Plan for Day 8–9.

HisabDo QA Test Document MohamedHany.xlsx — Website Test Cases, Mobile Test Cases, and Bug Report.

HisabDo_Test_Execution_Report_Day8_Day9.pdf — this Test Execution Report.

8. Final QA Status

Website: 22 cases executed — 21 Passed, 1 Failed.

Mobile Application: 14 cases executed and Passed; 26 cases remain Not Executed.

Overall: 36 test cases executed, 35 Passed, 1 Failed, and 26 Not Executed.

Defects: 1 confirmed website defect is documented as BUG_001.

The execution report reflects the actual status recorded in the Excel test document and does not fabricate results for unexecuted test cases.
